Job Summary	

At Manulife John Hancock, we believe in investing in the future - starting with you. Our Finance Co-op is your launchpad to success, offering the support, structure, and exciting opportunities you need to thrive and make your mark.

Our Finance Co-op Program, available at our Toronto office provides invaluable hands-on experience and serves as a direct pathway to our Finance Development Program. You'll gain technical expertise, business insight, and leadership skills while collaborating with dedicated professionals in a supportive and nurturing environment. This opportunity is ideal for undergraduate students eager to acquire real-world experience in finance.

Available Roles for the Fall 2026 Term: Private Equity Investments, Sustainable Investing in Public Markets, Wealth Investments, and Investment Counsel Support.

Please note that your application will be considered for multiple positions within this job posting.

Job Responsibilities

Position Responsibilities:

- Support portfolio and investment team activities across managed accounts, hedging programs, and private investments, including day to day operations, analysis, and project work.
- Conduct investment research and analysis by reviewing analyst reports, market data, company information, and industry trends to support prospective and existing investments.
- Assist with portfolio review, calibration, and monitoring using modern portfolio management and market data platforms, ensuring accuracy and alignment with program objectives.
- Contribute to due diligence, valuation analyses, financial modeling, risk assessments, and periodic portfolio reviews for public and private investment holdings.
- Produce reports and summaries, including exposure, risk, performance, and adhoc analysis, to support investment decision making and internal programs.
- Support process improvement initiatives by developing job aids, documentation, repeatable workflows, and AI enabled tools to enhance investment analysis and monitoring.
- Collaborate with senior team members and cross-functional partners on projects and initiatives, adapting to shifting priorities and emerging business needs.

Required Skills

Required Qualifications:

- Currently pursuing an undergraduate degree in Business, Finance, Accounting, Engineering, Computer/Data Science, Mathematics, Actuarial Science, or a related field.
- Strong quantitative and analytical skills, with interest or exposure to financial analysis, modeling, valuation, or investment research.
- High attention to detail with strong organizational, project, and time management skills in a fast-paced environment.
- Excellent written and verbal communication skills, with the ability to synthesize information and present insights clearly.
- Highly motivated, proactive team player with a strong interest in investing, technology, and continuous learning; familiarity with AI or data tools is an asset.

Compensation and Benefits

Salary range is expected to be between: \$44,850.00 CAD - \$60,450.00 CAD

The actual salary will vary depending on local market conditions, geography and relevant job-related factors such as knowledge, skills, qualifications, experience, and education/training. The annual salary will be pro-rated based on the length of the work-term.
