Job Summary

For over 30 years, Maplesoft has been a leading provider of software tools for engineering, science, research and teaching. Maple is math software that combines the world's most powerful math engine with an interface that makes it extremely easy to analyze, explore, visualize, and solve mathematical problems.

Maple Learn, an online version of the powerful math software Maple, is a dynamic environment designed specifically for teaching and learning math and solving math problems. Maple Learn is focused on the needs of educators and students in high school, community and two year colleges, and the first two years of university.

We are currently looking for 1 Math Content Developer to support the development of existing and new Maplesoft products.

Working at Maplesoft

Our teams build world-class software and services for system simulation, calculation management and systems engineering. Our product suite reflects the philosophy that given great tools, people can do great things!

Maplesoft offers a collaborative culture and the opportunity to work on some of the most innovative and exciting projects in the industry. We are committed to providing every employee with professional growth opportunities, a supportive work environment, and excellent compensation and benefits. Our Waterloo, Ontario office provides monthly catered lunches, daily snacks and an onsite, fully equipped fitness facility.

Job Responsibilities

- Create interactive and engaging math content (problems and examples) for Maplesoft's products and help with maintenance of our public content gallery.
- Provide support to Maplesoft's development, marketing and sales teams through content creation, testing and assisting customers, as needed.
- Contribute to marketing efforts by creating videos, training materials and social-media posts.

Required Skills

- Math degree program, or other STEM program and outstanding mathematical aptitude.
- Very strong written and verbal communication skills.
- Excellent time management and organization skills, and ability to work independently or within a team.
- Any of the following would be assets: teaching or tutoring experience; familiarity with Maple or Maple Learn; programming experience.

Compensation and Benefits

\$22 - 26 / hour, depending on year of study.
