### Job Summary

#### Web Application Developer Co-op

At Kenna, one of our core philosophies is Customer First Thinking. It's how we help our clients' turn customers into their biggest fans. That philosophy is echoed in the way we treat our employees. By putting people first, we attract some of the marketing industry's brightest minds, and we're proud of our sterling track record of hanging onto them. Join Kenna as a co-op student, and not only will you help build our clients' businesses - you'll grow your own potential. Whether your true calling is in Client Service, Creative, Data Solutions, Digital Design, Insights & Strategy, Finance, Application Development, IT Services or Social Media, you'll find it all under one roof at Kenna. So if you're looking to make a meaningful impact on one of these diverse teams, this could be a great opportunity for you. And us.

#### Description

Kenna is looking for brilliant, talented, and passionate individuals to join our team of over 25 experienced professional web developers. We want to enable you to discover your passion for web development in a new and exciting environment designed to

foster creativity and innovation.

### Career Development

Kenna is devoted to helping students succeed in their future career. We will help you learn the concepts, technologies, frameworks, and tools for a career in web development by providing hands-on training and professional development tailored to students' needs and capabilities. Work with industry veterans and other students to build professional relationships, contacts and friendships for your future career. Don't believe us? Ask all the developers we've hired that were former co-op students.

### Testimonials

#### Surajpratap Goraya (2B Computer Science)

Working at Kenna has been sincerely wonderful, and I truthfully couldn't have asked for a better first CO-OP experience. Everyone I've worked with at Kenna has been nothing less than welcoming, kind, and especially patient with me as I learned the ropes around how some of their older systems worked. Kenna's social events and employee benefits (such as the Kenna Café) are truly great and are the cherry on top to their great working environment. Last but not least, Kenna allows you to grow as a developer, and the managers are very receptive to your suggestions and individual goals as a dev. Overall, Kenna is a wonderful place to work, and although some of their older systems are somewhat frustrating to get used to and work with, the overall environment, support and people at Kenna are nothing less than amazing.

#### Kenneth Matira (5A Actuarial & Financial Mathematics)

I've been at Kenna for quite a while (three terms as a BI/SQL Developer and two terms as a Web Developer) and I can safely say that my time here has been wonderful. Despite my non-cs background and very limited experience in web languages, all my supervisors have been very patient and helpful with me and my journey to learn as well as all developers being very easy to approach when stuck on a problem. During my time here, I have been able to work on many different projects and work on different parts of web development (front-end, back-end, sql), sharpening my learning/experience along with learning on what I like and prefer versus what I don't. Overall my experience at Kenna has only been positive and would highly recommend it to anyone.

### Hybrid Working Model

This position follows a **hybrid work model**, with students required to work **in-office at Kenna Mississauga three days a week (Tuesdays, Wednesdays, and Thursdays)** and **work remotely from home for two days (Mondays and Fridays)**.

Students will frequently be required to attend organizational, departmental, team, and project meetings requiring the use of both their microphone and their camera.

### Job Responsibilities

#### Responsibilities

Develop new and innovative web solutions that adhere to industry standards and best practices

Utilize analytical and problem-solving skills to overcome challenges and provide unique solutions

Provide meaningful suggestions, feedback, and insights to support business goals

Update, enhance and maintain existing web solutions

### Required Skills

#### Required Skills

Strong programming background including relevant experience or course work

Strong understanding of fundamental programming principles (object-oriented programming, data structures, algorithms)

Proficiency in fundamental web languages (HTML, JavaScript, CSS)

Non-essential Skills

NodeJS

React, JQuery, KendoUI, Materialize

SQL, MySQL

Web Services/APIs (RESTful/SOAP), XML, JSON, AJAX

AWS (CloudFormation, Stacker, Runway)

Visual Basic, VBA, Domino, Lotus Notes

JavaScript concepts (ES6, prototyping, SPAs, concurrency frameworks)

CSS concepts (CSS Grids, flex box, transitions, keyframes, animations, pseudo elements, media queries)

Responsive design

Version control (Git, GitHub, Bit Bucket)  
Continuous Integration Tools (Jenkins)

### **About You**

Passionate about web development  
Self-motivated  
Strong desire to learn new skills and apply them in real world settings  
Strong problem solving and decision-making skills  
Ability to work both as part of a team and independently  
Excellent written & verbal communication skills  
Ability to engage and share new ideas with the team

### **Compensation and Benefits**

#### **Benefits**

Fun, positive and professional environment to learn and develop  
Team building events, social events, company events, and virtual events  
Hybrid working model with the flexibility of working two days remotely (Mondays and Fridays)
